ABOUT ME

I am a Full Stack Developer with AI integration experience, focused on building intelligent and scalable web applications. With 6+ real-world projects including an AI Career Assistant, a PDF Chat App, and a tourism web application I have delivered clean architecture and secure backend systems that solve real business problems. I work with React.js, Next.js, Node.js, Express.js, MongoDB, Google LLM and other LLM, LangChain, and ChromaDB. I am currently looking for a junior full stack developer role , onsite or remote where I can contribute and grow.

EXPERIENCE

FullStackDeveloper Intern

TargLabs

(August — Present)

Remote

Currently working as a Full Stack Developer intern at TargLabs, gaining hands-on experience in building modern web applications and collaborating with a professional and destinations development team

Full stack Developer Intern

Fluxxion (Remote)

June 14 — August 14

Remote

I worked as an intern at Fluxxion from June 14 to August 14. During this internship, I created three projects that enhanced my practical knowledge and technical skills. This experience helped me apply my learning in real-world scenarios and improve my problem solving abilities

Full stack Developer

NovaDevStudiosInnovative Digital Solution

June 20—August 1

Remote

I worked remotely from June 20 to August 1, during which I developed an ecommerce website for a T-shirt business. This project allowed me to gain hands-on experience in building and managing an online store

Self-employed

Self-employed

April 1 — June 1

Freelance Projects

During these two months, I gained invaluable experience and created a Complaint Management System and other projects.

EDUCATION

BS in Computer Science

Universityof Peshawar

2023 - 2027

Peshawar

Google AI & other LLM

PROJECTS

AI Career Assistant

- Developed a comprehensive AI Career Assistant that helps users generate ATS-friendly resumes within seconds.
- In this website, users can also practice interviews by selecting roles like HR, Technical, and CEO.
- Users can analyze their resumes with ATS score, strengths, weaknesses, and suggestions.

PDF Summary & Chat Application

- AI-powered web application that allows users to upload PDF documents and generate concise summaries and ask contextual questions based on document content
- Implemented semantic search using vector accurate AI responses
- Built with Next.js, Node.js, Express, MongoDB, and integrated Google Gemini API with a vector database (ChromaDb)
